

# L'EXPLORATEUR IN BASEL

L'Explorateur is a brand-new modular and portable organ based in Toulouse. It features a unique system that allows the wind supply of each individual pipe to be controlled via any MIDI device. This transforms the organ into an extraordinary acoustic synthesiser with a truly unique ADSR, capable of building bridges across genres, musical disciplines, and modes of expression.

---

---

With its current six modules, the organ will be in Basel from March 2nd to March 7th, offering a series of workshops for students from the Schola Cantorum Basiliensis, Electronic Studio Basel, Sonic Space Basel, MHS Klassik and the Jazz Campus.

The results of the workshops will be presented in three concerts and will open stage to two jam sessions:

## **Concert I & Jam-Session**

Wednesday, March 4th at 19:00

## **Concert II & Jam-Session**

Friday, March 6th at 19:00

## **Closing Concert**

Saturday, March 7th at 19:00

---

---

Visits by artists from diverse backgrounds will also take place during this week, creating opportunities to connect a wide range of musicians, sound artists, composers, and performers interested in exploring the organ pipe's new musicking possibilities.
